

app.prfmtmr.link

Welcome to PRFMR

The performance system for fighters
who want to **make weight** and
perform at their best.

Personalised calorie & macro targets

Built around your body, goals and fight date.

Training-adjusted calorie system

Calories adapt to your training load
so you're always fuelled right.

Micronutrient performance scoring

Track what matters. Optimise what
most fighters miss.

Fight camp weight cut planning

A safe, realistic plan to hit weight
without compromising performance.

Training load tracking & warnings

Monitor fatigue, prevent overreaching
and stay fight ready.

Takes 2 minutes. Built for your next fight.

Let's build your plan →

app.prfmtmr.link

Be honest.

Are you struggling to:

- Plan your weight cut safely?
- Know how much to eat?
- Balance training and recovery?

Yeah, that's me →

25

app.prfmr.link

This is where it changes.

PRFMR is your fight camp system.

- ✓ Plans your weight cut safely
- ✓ Adjusts calories based on training
- ✓ Tracks your performance & recovery
- ✓ Ensures your nutrition actually fuels output

"You don't need to guess. You need a system."

25

Do you know which
micronutrients matter?

No idea

Not really

Yes

< Back

Next →

app.prfmr.link

User, this isn't random.

Most fighters aren't underperforming by accident.

65% of fighters have had a failed weight cut

~90% aren't fueling training properly

Most are missing key micronutrients consistently

And training? Still managed by guesswork — not data.

< Back

Next →

25

app.prfmtmr.link

You don't have to fight like this.

Imagine:

- ✓ Feeling strong every session
- ✓ Never missing weight
- ✓ Performing at your peak

You're not alone.

Most fighters struggle with:

- > Wrong weight class
- > Calories & macros confusion
- > Micronutrients

PRFMR is built to fix exactly this.

**PRFMR**

Current weight

70 kg

Target weight (kg)

62

Fight date

30 Sep 2026

Not sure? Use your approximate target weight class and the date of your next planned competition or training block. You can update both anytime from your dashboard.

Weigh-in timing

Same day

Day before

Manual water cut (typically 24–36 hours before weigh-in)

Leave blank for automatic estimate

Overrides the automatic 2–6% BW water-weight estimate. This app does not provide acute weight-cut guidance.

**On track**

0.8% BW/week required

Build your fight camp plan.

Enter your details — PRFMR calculates the exact cut.
